

DEXSTAR[®]

WHEEL COMPANY

A KENDA Company

 **Made in USA**

WHEELS & RIMS TO KEEP YOUR COMPANY MOVING FORWARD

- Trailers: RV - Utility - Cargo - Marine
- Manufactured Housing
- Lawn & Garden: Tractors - Mowers
- Agricultural: Farm Equipment
- E-Coat Primer Powder Finish
- Meets DOT Specifications
- Made in USA
- ISO 9001:2008

Full - Wheels are Powder Coated on Front and Back Sides.

WHEEL COMPANY

Made in the USA

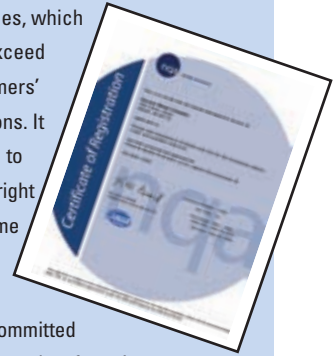

IMPRESSIVE Capabilities

Dexstar is capable of producing 12" to 16.5" wheels on its two high speed fully automated roll forming lines. A recent re-engineering of tooling has given Dexstar the capability of producing a 12 x 7 and a 12 x 8.5 wheel. The significant use of automation and robotics allows Dexstar's welding capabilities to be recognized as superior in the industry. Each Dexstar wheel is e-coated prior to going through a state-of-the art powder coat system, all of which is done in-house. Dexstar's automated operation gives the company the production capacity to supply the largest trailer distributors and manufacturers in the world.

SUPERIOR Quality

Dexstar Wheel Company is committed to provide products and services, which meet or exceed the customers' expectations. It is our goal to do things right the first time and every time. We are also committed to the philosophy of continuous improvement through the contribution of every employee.

LIMITED 2 YEAR WARRANTY

Dexstar Wheel Company warrants to the original purchaser that its wheels shall be free of defects in the material and workmanship for a period of two (2) years from the date of the first sale of the trailer incorporating such components.

WHAT YOU MUST DO

In order to make a claim:

1. You must be the original purchaser of the trailer of which the wheels were originally installed.
2. You must promptly notify us within the warranty period of any defect and provide us with any substantiation that we may reasonably request.
3. The wheels must have been installed and maintained in accordance with good industry practice and any specific Dexstar Wheel Company recommendations.

EXCLUSIONS

This warranty does not extend to or does not cover defects caused by:

1. Normal wear and tear.
2. Improper installation or use.
3. Improper wheel nut torque.

LIMITATIONS

1. In all cases Dexstar Wheel Company reserves the right to fully satisfy its obligations under the Limited Warranty by refunding the then-current list price of the defective wheel (or, if the wheel has been discontinued, of the most nearly comparable current product).
2. This warranty is nontransferable.

GENERAL

The foregoing warranty is exclusive and in lieu of all other warranties except that of title, whether written, or oral or implied, in fact or in law (including any warranty of merchantability or fitness for a particular purpose.)

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

The duration of any implied warranties, including the implied warranties of merchantability and fitness for a particular purpose, are limited to the duration of the express warranties herein. Dexstar Wheel Company hereby excludes incidental and consequential damages, including loss of time, inconvenience, loss of use, towing fees, telephone calls or cost of meals, for any breach of any express or implied warranties of merchantability and fitness for a particular purpose.

Some states do not allow limitations on how long an implied warranty lasts, or the exclusion or limitation of incidental or consequential damages, so the above exclusions or limitations may not apply to you.

		16" & 16.5"	.625	1/2" -20 60*	90-120 LB/FT
				9/16"-18 60* 5/8"-18 90*	175-225 LB/FT 175-225 LB/FT
8 on 6.5"	Hub Piloted	14.5"	.45	5/8"-18 Flange	275-325 LB/FT
		16", 16.5" & 17.5	.625		

Improperly clamped wheels may loosen and could come off unexpectedly while traveling, resulting in a dangerous situation. Dexstar recommends that wheel fasteners be checked frequently and retorqued to the appropriate level as needed.

Also of vital importance is understanding the different wheel clamping systems. Smaller steel wheels up to and including some 16" varieties are normally stud piloted and will typically use a 60-degree cone nut. The cone portion of the nut mates to a matching cone seat in the wheel center. These are generally 1/2" - 20 or 9/16" - 18 thread sizes. There are some larger wheels that are designed to be clamped with 5/8" nuts featuring a 90-degree cone seat. This type of wheel generally does not have a center hole that closely fits the hub.

90-degree cone nuts must NEVER be used in 60-degree cone seat wheels. The use of mismatched nuts will result in a loss of clamping force and can cause wheel run-off.

Larger wheels generally will be hub piloted and require either clamping rings with 90 degree cone nuts to attach them to the hub or they can be mounted with flange nuts directly on the wheel. The benefit of the clamp ring system is they require lower torque. Both of these mounting systems typically use 9/16" - 18" or 5/8" - 18 thread size. Hub piloted wheels require a close fit of the center hole to the hub.

Make sure you understand the requirements of the wheels and clamping systems that you specify for your vehicles. Misuse can result in costly and dangerous failures.
